FOREWORD

Every year since 1939, the **Commodity Year Book**, known as "the Bible of the commodity trades," has carried the most extensive and accurate compilation of commodity information available from both public and private sources. The **Year Book**, compiled and edited by the staff of the Commodity Research Bureau is used by industry, government agencies, university and special libraries, and by leading brokerage firms and banking institutions.

The **Commodity Year Book**, like all annuals, is current only at the time of publication. It cannot continue to serve as a reference source of up-to-date statistics later in the year. Therefore, the **Commodity Year Book Statistical Abstract Service** is published three times yearly in order to update the data presented in the **Year Book**.

Each issue of the **Abstract** is divided into three sections. The tables within each section are arranged to follow the **Year Book** format. The parenthetical numerals after each commodity title in the **Abstract** refer to the **Year Book** page that presented the original statistical data for that particular commodity.

Section I contains approximately 400 updated tables corresponding to the monthly tables in the **Commodity Year Book**. Section II presents all annual tables in which there have been significant changes since the publication of the **Year Book**. Section III contains more than 20 cash price charts for selected important commodities. These charts, which are likewise updated in each issue of the **Abstract**, are plotted on a monthly basis, and they cover about 10 years of price activity.

FOREWORD

Every year since 1939, the **Commodity Year Book**, known as "the Bible of the commodity trades," has carried the most extensive and accurate compilation of commodity information available from both public and private sources. The **Year Book**, compiled and edited by the staff of the Commodity Research Bureau is used by industry, government agencies, university and special libraries, and by leading brokerage firms and banking institutions.

The **Commodity Year Book**, like all annuals, is current only at the time of publication. It cannot continue to serve as a reference source of up-to-date statistics later in the year. Therefore, the **Commodity Year Book Statistical Abstract Service** is published three times yearly in order to update the data presented in the **Year Book**.

Each issue of the **Abstract** is divided into three sections. The tables within each section are arranged to follow the **Year Book** format. The parenthetical numerals after each commodity title in the **Abstract** refer to the **Year Book** page that presented the original statistical data for that particular commodity.

Section I contains approximately 400 updated tables corresponding to the monthly tables in the **Commodity Year Book**. Section II presents all annual tables in which there have been significant changes since the publication of the **Year Book**. Section III contains more than 20 cash price charts for selected important commodities. These charts, which are likewise updated in each issue of the **Abstract**, are plotted on a monthly basis, and they cover about 10 years of price activity.

FOREWORD

Every year since 1939, the **Commodity Year Book**, known as "the Bible of the commodity trades," has carried the most extensive and accurate compilation of commodity information available from both public and private sources. The **Year Book**, compiled and edited by the staff of the Commodity Research Bureau is used by industry, government agencies, university and special libraries, and by leading brokerage firms and banking institutions.

The **Commodity Year Book**, like all annuals, is current only at the time of publication. It cannot continue to serve as a reference source of up-to-date statistics later in the year. Therefore, the **Commodity Year Book Statistical Abstract Service** is published three times yearly in order to update the data presented in the **Year Book**.

Each issue of the **Abstract** is divided into three sections. The tables within each section are arranged to follow the **Year Book** format. The parenthetical numerals after each commodity title in the **Abstract** refer to the **Year Book** page that presented the original statistical data for that particular commodity.

Section I contains approximately 400 updated tables corresponding to the monthly tables in the **Commodity Year Book**. Section II presents all annual tables in which there have been significant-changes since the publication of the **Year Book**. Section III contains more than 20 cash price charts for selected important commodities. These charts, which are likewise updated in each issue of the **Abstract**, are plotted on a monthly basis, and they cover about 10 years of price activity.
